

COST OF THE 2018-2050 ACTION PLAN OF THE NATIONAL BIODIVERSITY STRATEGY

Before analyzing the financing sources, it is important to determine the Financing Needs. These requirements must be agreed upon with all sectors of society. Fortunately, Panama has a National Biodiversity Strategy Action Plan, to guarantee the conservation and sustainable management of biodiversity.

The Action Plan is organized into **5 strategic axes:**

Conservation and restoration.

Investment USD
45,215,000

Reduction of pressures on Biodiversity.

Investment USD
19,895,000

Environmental knowledge, awareness and education

Investment USD
8,785,000

Sustainable use and management.

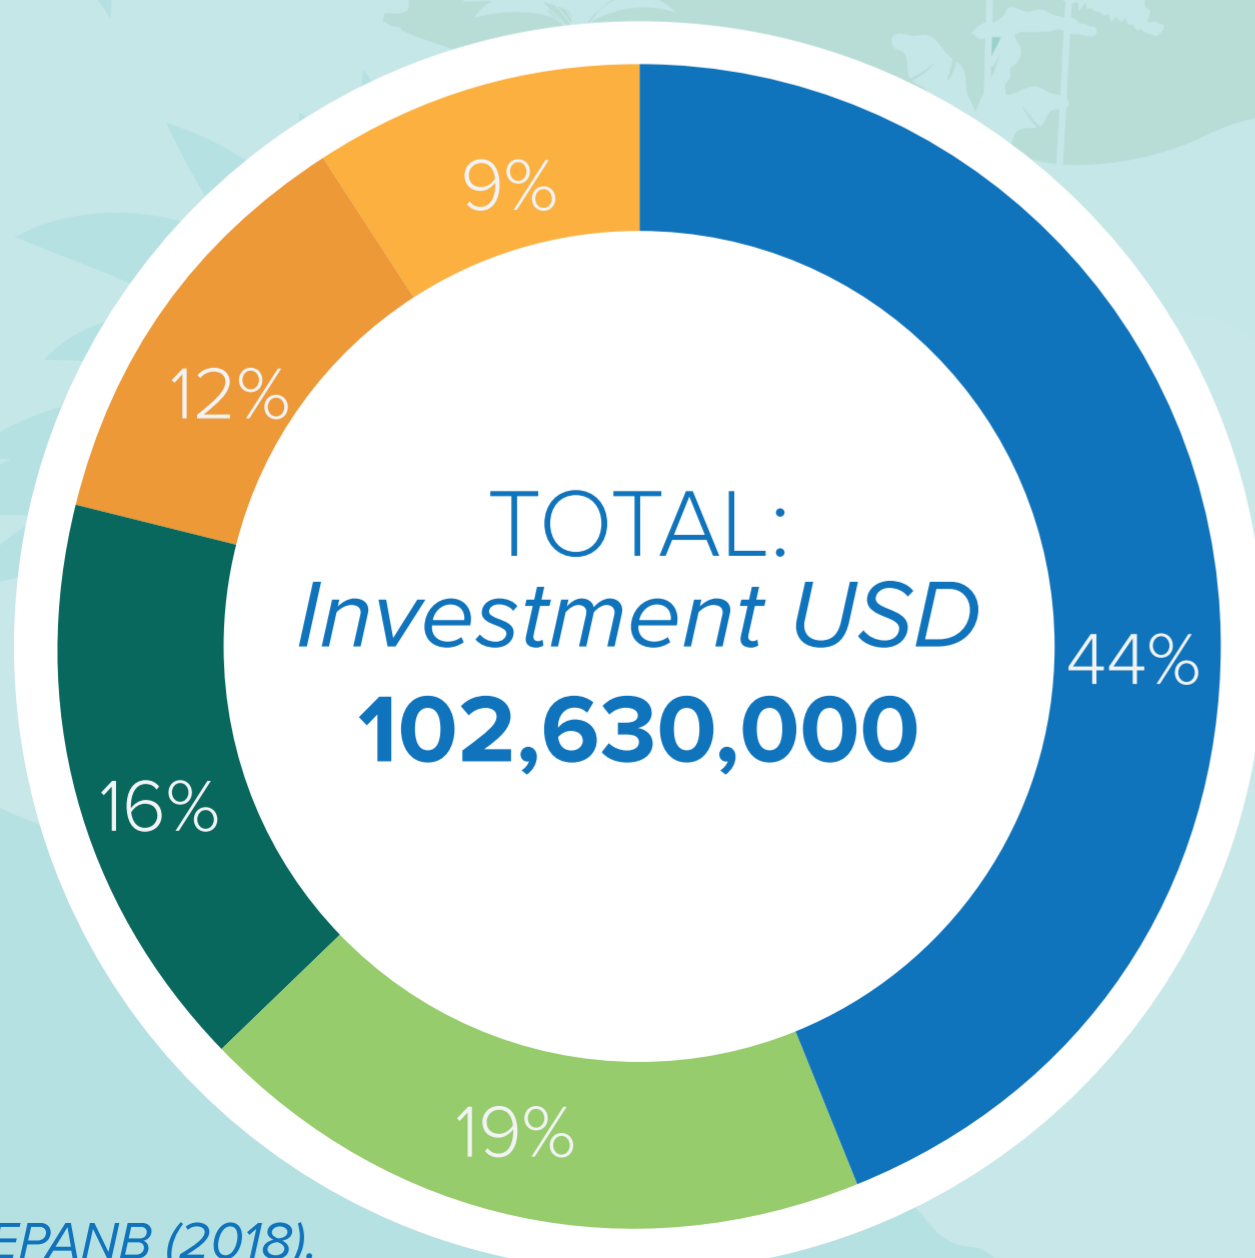

Investment USD
16,260,000

For each axis, different lines of action were proposed, with a series of action guides that allow the plan to be grounded in operational and budgetary terms (linking it to national goals and key actors).

Integration and Governance.

Investment USD
12,475,000

- Conservation and Restoration
- Reduction of pressures on Biodiversity
- Sustainable use and management
- Integration and Governance
- Environmental knowledge, awareness and education
